

Validation of users to OnePetro.org

NTNU subscribes to OnePetro.org, and students and employees of NTNU may download papers free of charge, provided that their email address ends with ntnu.no.

OnePetro's instructions are as follows:

The steps to domain address validate are as follows. As users visit onepetro.org, we will ask that they click on Register and complete a very short form to build their own My OnePetro account. Once done, they will need to click on My Account. They will then click on the Go button under Domain Validation. We will ask that they click on a button that says Validate Me. They will then be sent an email requesting that they confirm delivery. The process should take no more than 15 minutes. Once validated, users will have 90 days of access. Once the 90 days are over, they will need to re-validate through the same process.
