

Nordic Petroleum Technology Series VI

Proceedings

6th Nordic Symposium on Petrophysics

15 - 16 May 2001, Trondheim, Norway

Nordic Energy Research Programme

Norwegian U. of Science and Technology

Proceedings – 6th Nordic Symposium on Petrophysics – 2001

Nordic Petroleum Technology Series VI

Proceedings

6th Nordic Symposium on Petrophysics

15 - 16 May 2001, Trondheim, Norway

How to use this CD-ROM

The Proceedings is organised as webpages where the papers in PDF format can be retrieved, viewed and printed. To start, please doubleclick on the file *6th_Nordic.html* which will launch your web browser.

Alternatively, the papers can be viewed by opening them in Adobe Acrobat Reader – they can be found in the *Papers* directory. The contents is included in Word, pdf and ascii formats as well.

Sponsored by the Nordic Energy Research Programme.
Hosted by the Norwegian University of Science and Technology, NTNU,
Department of Petroleum Engineering and Applied Geophysics, IPT.
www.ipt.ntnu.no/nordic, nordic@ipt.ntnu.no

Editors: Knut Backe and Ton Loermans
ISBN 82-994330-6-1, January 2003

Proceedings – 6th Nordic Symposium on Petrophysics – 2001

6th Nordic Symposium on Petrophysics

Contents

- Determination of Petrophysical and Mechanical Property Interrelationships for Simulated Sandstone Rocks, *Al-Homadh, Hamada*
- Application of committee machines in reservoir characterisation while drilling: A novel neural network approach in log analysis, *Bhatt, Helle, Ursin*
- Impacts of capillary pressure imbibition curves on the simulation of waterfloods in high capillary moderately-water-wet chalk, *Bogno, Graue*
- Forget better statistics - concentrate on better sample selection!!, *Corbett, Potter, Mohammed, Liu*
- Syn-Depositional Architecture and Petrophysical Properties of the Cambrian Siliciclastic Hydrocarbon Reservoirs in Lithuania, *Cyziene, Sliupa, Molenaar*
- Application of three-dimensional failure surfaces to high porosity chalk, *Flatebo, Risnes*
- Petrophysical properties of igneous rocks in Icelandic geothermal systems, *Franzson, Friðleifsson, Gudlaugsson*
- Oil Recovery in Fractured Reservoirs, *Graue, Moe, Bogno*
- Petrophysics under Stress, *Holt*
- NMR-Based Water Saturation Estimates in Ekofisk Waterflood Zones, *Howard, Hermansen, Vedvik*
- Upscaling Miscible Displacement Processes, *Jákupsstovu, Zhou, Kamath, Durlinsky, Stenby*
- The Stages of Volcanic Rock Petrophysical Property Alteration During the Earth's Evolution, *Ladygin, Frolova*
- Anisotropy and Petrophysical Properties of the Rift Zone Rocks at Triple Point Bouvet, *Ladygin, Panasiyan, Bulichev, Guilod, Liggi, Zetelinni*
- Estimating the Directional Permeability of Reservoir Sandstones Using Image Analysis, *Lock, Jing, Zimmerman*
- Advances in rock and fluid properties determination from NMR logs, *Looyestijn*
- Adsorption of 2,4-xylidine on granulated activated carbon in a packed bed absorber, *Reinik, Kallas*
- Water saturation from cores, *Ringén, Halvorsen, Lehne, Rueslaatten, Holand*
- Electric properties of siliciclastics in Baltic Cambrian basin, *Shogenova, Jõelet, Kirsimäe, Sliupa, Rasteniene, Zabele*
- Network Modeling as a Tool for Petrophysical Measurements in Chalk, *Talukdar, Ioannidis, Howard, Torsæter*
- Deformation and failure of samples probed by NMR, *vd Zwaag, Veliyulin, Skjetne, Lothe, Holt, Nes*
